EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

In claim 8: Status identifier has been changed. "(Previously presented)" has been changed to "--(Currently amended)--".

The following is an examiner's statement of reasons for allowance: The present invention is directed to a microphone gasket. Independent claim 6 identifies the uniquely distinct feature of a sound receiving tube with a 4 kHz cutoff frequency and sufficient length (15mm) to provide electrostatic discharge protection. Independent claim 7 identifies the uniquely distinct feature of a membrane integrally molded with a sound receiving tube and perforated with nine square holes of 0.25 mm evenly distributed across the membrane. The closest prior art, Barnes (GB 2064263) teaches a microphone unit with a circularly recessed web for passing sound to the microphone and Gastmeier (US 439082) teaches an acoustic damping element in an acoustic tube for a microphone. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
